Please note as prices increase the surcharge will continue to increase.

UK Mail uses a variable fuel adjustment mechanism. So when fuel costs go up, we will surcharge your account and when they come down, we will reduce the charges. For every 2p increase on a litre of fuel, we will apply a surcharge to your invoice of .25%. For every 2p reduction on a litre of fuel, we will apply a discount to your invoice of - .25% up to a maximum of -1% from the base rate. The fuel adjustment is calculated monthly and applied to your invoice at the end of the month. The applicable rate is available for you to see ten working days before the first day of the month.
